### **Biotechnologies for Agricultural Development**

Biotechnology is the broad area of biology involving living systems and organisms to develop or make products, or "any technological application that uses biological systems, living organisms, or derivatives thereof, to make or modify products or processes for specific use" (UN Convention on Biological Diversity, Art. 2). Depending on the tools and applications, it often overlaps with the (related) fields of molecular biology, bio-engineering, biomedical engineering, biomanufacturing ...

ISAAA in Brief Mission. Food, feed, fiber, and fuel for the world's 800 million people who suffer from hunger and poverty – this is the formidable task for many countries, development agencies, and other interest groups.

### **ISAAA in Brief - ISAAA.org**

Agriculture is the cultivation of land and breeding of animals and plants to provide food, fiber, medicinal plants and other products to sustain and enhance life. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities.

Global Knowledge Center on Crop Biotechnology. A major mission of the International Service for the Acquisition of Agri-biotech Applications (ISAAA) is to foster knowledge-based and transparent decision making on crop biotechnology. It facilitates and supports the sharing of information and experiences among different stakeholders through its Global Knowledge Center on Crop Biotechnology, more popularly known as the KC, which is based at the ISAAA Southeast Asia Center in the Philippines.
