

### **essentials of traumatic injuries pdf**

Primary and secondary brain injury are ways to classify the injury processes that occur in brain injury. In traumatic brain injury (TBI), primary brain injury occurs during the initial insult, and results from displacement of the physical structures of the brain. Secondary brain injury occurs gradually and may involve an array of cellular processes.

Osteoarthritis (see the image below) is the most common type of joint disease, affecting more than 30 million individuals in the United States alone. It is the leading cause of chronic disability in older adults, costing the US greater than \$185 billion annually. It can be thought of as a degenerative disorder arising from the biochemical breakdown of articular (hyaline) cartilage in the synovial joints.
