International law is the set of rules generally regarded and accepted in relations between nations. It serves as a framework for the practice of stable and organized international relations. International law differs from state-based legal systems in that it is primarily applicable to countries rather than to individual citizens.

"International economic law" is an increasingly seminal field of international law that involves the regulation and conduct of states, international organizations, and private firms operating in the international economic arena. As such, international economic law encompasses a broad range of disciplines touching on public international law, private international law, and domestic law applicable to international business transactions.
