In mathematics, a fractal is a subset of a Euclidean space for which the Hausdorff dimension strictly exceeds the topological dimension. Fractals are encountered ubiquitously in nature due to their tendency to appear nearly the same at different levels, as is illustrated here in the successively small magnifications of the Mandelbrot set.

About the books The English version "Architectural Geometry" was published in 2007 by Bentley Institute Press. Motivated by the huge success the authors translated chapters 1-11 and 16 to create a shorter German version entitled "Architekturgeomtrie", published jointly by Springer and Bentley Institute Press in 2010.
