CHPATER 1 INTRODUCTION Human Computer Interaction focuses on the interactions between human and computer systems, including the user interface and the underlying processes which produce the interactions. The contributing disciplines include computer science, cognitive science, human factors, software engineering, management science, psychology, sociology, and anthropology. Early research and development in human-computer interaction focused on issues directly related to the user interface ...

The ACM CHI Conference on Human Factors in Computing Systems is the premier international conference of Human-Computer Interaction. CHI 2014 is a celebration of the conference's one of a kind diversity; from the broad range of backgrounds of its attendees, to the diverse spectrum of communities and fields which the conference and its research have an impact on.

### **Welcome | CHI 2014**

Welcome to CHI 2006! CHI is the leading international conference on human-computer interaction (HCI). It provides an opportunity to interact with your colleagues, to inform each other about the latest results and methods in the HCI field, and to inspire each other to move the field forward.
