

science policy ethics and pdf

Science, technology, and innovation (STI) have the power to transform societies by providing solutions on how to eradicate poverty, improve social and economic conditions, increase resilience to natural hazards, and preserve natural resources for future generations.

Science Policy | United Nations Educational, Scientific and Cultural

Science policy is concerned with the allocation of resources for the conduct of science towards the goal of best serving the public interest. Topics include the funding of science, the careers of scientists, and the translation of scientific discoveries into technological innovation to promote commercial product development, competitiveness, economic growth and economic development.

Maria Ossowska thought that sociology was inextricably related to philosophical reflections on morality, including normative ethics. She proposed that science analyze: (a) existing social norms and their history, (b) the psychology of morality, and the way that individuals interact with moral matters and prescriptions, and (c) the sociology of morality.
