

typography pdf

Typography is the art and technique of arranging type to make written language legible, readable, and appealing when displayed. The arrangement of type involves selecting typefaces, point sizes, line lengths, line-spacing, and letter-spacing (tracking), and adjusting the space between pairs of letters (kerning). The term typography is also applied to the style, arrangement, and appearance of the letters, numbers, and symbols created by the process.

Typography - Wikipedia

typeface The choice of typeface is less important than contrast, type size, weight and the spacing of characters. Quirky, unusual, script and titling faces are obviously highly inappropriate

typography for visually impaired people - Text Matters

The Microsoft Typography group researches and develops font technologies and supports the development of OpenType fonts by independent type vendors. This site provides articles to help you develop fonts, find existing fonts, and license fonts from registered vendors
